CC2 Cooktop

Gas

Christie cooktops are premium, self-contained outdoor cooking appliances that can be ordered with our pre-fabricated Modular or A Series benches, or installed in any custom structure that meets relevant safety standards.

Our CC2 cooktop won a Good Design Awarded in 2016 and represents the latest evolution in our ongoing development of the ultimate energy-efficient, long-lasting barbecue.

POWER SPECIFICATIONS:

Power: 12-volt DC only

Propane: Nominal hourly gas consumption 16Mj/h per hotplate. Test point gas pressure 2.6kPa

Natural gas: Nominal hourly gas consumption 15.8Mj/h per hotplate. Test point gas pressure 0.84kPa

Butane/Ulpg: Nominal hourly gas consumption 12.8Mj/h per hotplate. Test point gas pressure 2.6kPa

Connection: Bayonet and socket fitting for fast, simple, low cost connection

Weight: 21Kg

KEY FEATURES:

- Mono-pressed, marine-grade stainless-steel hotplate with corrosion resistant stainless steel burner for exceptional heat dispersal and ease of cleaning
- Unique sterilisation cycle for ultimate cooking safety and hygiene
- Highly sensitive micro-processor and control program that accurately maintains the optimum cooking temperature while conserving energy
- Intelligent self-diagnostics with fault codes and flashing warnings
- Electronic re-ignition and flame sensor
- Aluminium shield reflects 80% of radiant energy from the underside back to the hotplate
- Fast, low cost "plug and play" connections for ease of installation and servicing
- Guaranteed parts and dedicated service support Australia-wide

GAS COOKTOP CONTROLLER OPTIONS

Mains Powered: 240 volt AC to 12 volt DC Regulated Power Supply (battery eliminator) per cooktop

Stand-alone Battery: 12-volt DC, 26 amp/hour sealed lead acid battery and charger per cooktop

Solar Maintained 12-volt DC, 26amp/hour sealed lead acid battery, recharged by roof/pole mountable solar panel and cable, suitable for two cooktops
