

CHRISTIE

Open Bench Kit

Built-in or custom barbecue structures without doors may present a safety hazard by allowing access to the hot underside of the cooktop while in operation. Our proprietary Open Bench Kit safely encloses these hot components and provides an integrated waste container for ease of cleaning and maintenance.

NOTE: The benchtop and cooktop are not supplied as part of the Open Bench Kit

Open Bench Kits offer a practical solution for built-in barbecues without cabinet doors, and can be ordered with a Christie CC2 Gas or Electric cooktop. The kit is designed to suit a benchtop that meets the following criteria:

- For safety reasons, the benchtop must be made of non-combustible material and be at least 750 mm deep x 750 mm wide and 900 mm high from the ground
- The benchtop cutout must be at least 495 mm x 495 mm, and no larger than 540 mm x 540 mm
- Suitable for locations where the cooktop is not subject to excessive water ingress i.e. for indoor use, where a CC2 Hood is being used, or where the barbecue is undercover

SPECIFICATIONS:

- Manufactured from 304-grade stainless steel for ultimate corrosion resistance and ease of cleaning
- Vented slots prevent heat build-up
- Removable integrated waste container for ease of cleaning
- Simple and easy to install using conventional tools and fixings (not supplied)

Christie Open Bench Kit

Dimensions:

Width 480 mm
Depth 480 mm
Height 342 mm

Mounting Flange:

Width 574mm
Depth 504 mm

Weight: 11 kg
