

## Modular cabinet access doors

We manufacture our barbecue accessories and options to meet the same rigorous standards of quality, durability and ease of maintenance as our barbecue products. Our Modular doors are part of Modular Cabinet kits. Additional doors can be purchased as replacements or to create storage in the cabinet.

There are two types of access doors available:

### **Standard Access door for electric barbecues**

Lockable door designed specifically for access to the drip tray, or for additional access to materials stored inside larger barbecue cabinets.

### **Gas Storage Access Door**

A vented lockable door explicitly designed for access when storing 9Kg bottles or cleaning materials inside the Modular cabinet. You can also purchase a non-combustible internal enclosure to isolate gas bottles from cooktops. Do not install gas bottle enclosures or extra doors underneath cooktops.

---

### **DOOR & BRACKET MATERIALS:**

1.5Mm and 2mm stainless steel sheet, powder coated in Dulux Aztec Silver.

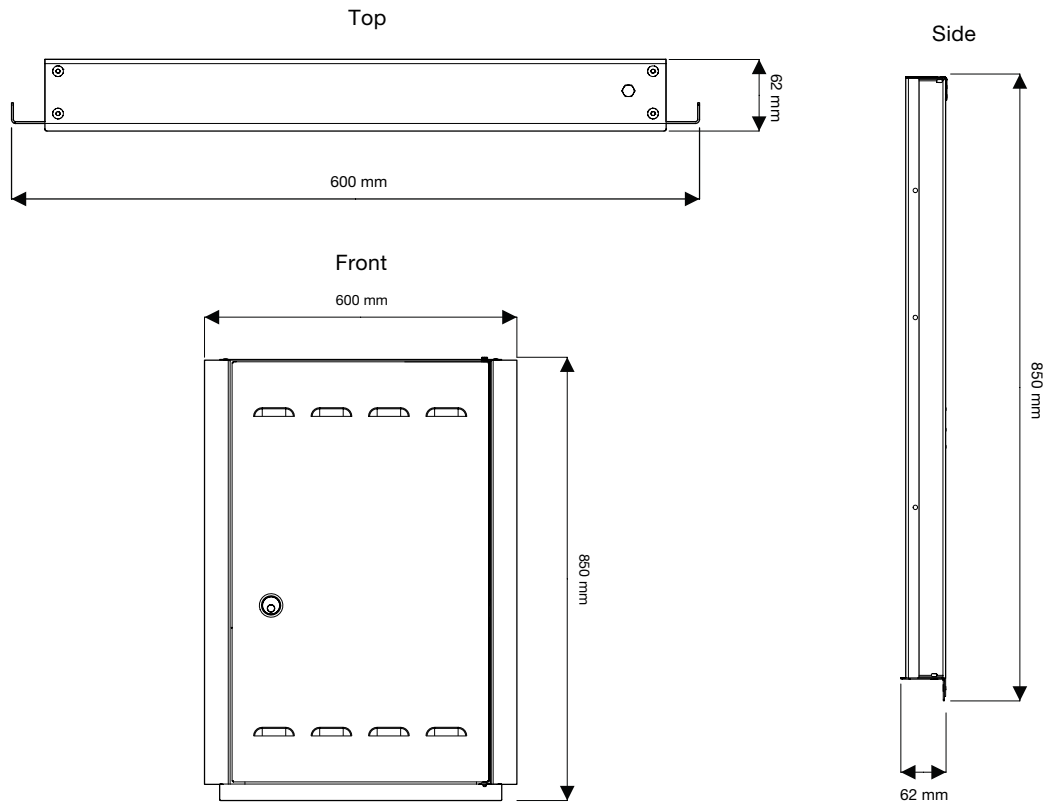

Options: #4 Brushed Stainless Steel finish, can be powder coated upon request to most colours in the Dulux Powder coat range. Custom panel colours may occur additional cost.
