

CHRISTIE

ICON Series

Introducing the Ultimate Public Barbecue

We introduced the first-ever public barbecue cabinet in 1996 to provide a sturdy and straightforward alternative to built-in barbecue structures. Twenty-five years on the Modular series' industry-defining shape is synonymous with the iconic Australian public barbecue.

The ICON is a modern interpretation of our sought-after Modular cabinets. We designed it to provide universal access for all users while retaining an uncompromising focus on safety, durability, and ease of maintenance.

CONTEMPORARY AESTHETIC

The sleek, low profile benchtop with low-impact corners increases usable bench space while maintaining a small footprint. The stainless-steel cabinet, with rounded corners and curved end panels, is available in an extensive range of colours.

EXPANSIVE BENCHTOP

Our research shows that communal barbecues are mainly used by groups. That's why the ICON's distinctive shark-nosed benchtop offers exceptionally generous food preparation space.

FLAT-PACKED CONVENIENCE

Communal barbecues are increasingly installed on rooftops and in other urban locations. We ship ICON cabinets flat-packed for easy site access, saving you transportation and offloading costs.

ACCESS FOR ALL

The ICON meets the rigorous standards for wheelchair access. The Disability Discrimination Act (DDA) compliant design enables seated and standing users of all abilities to reach the cooktop.

ICON Series

The Ultimate Public Barbecue

VERSATILE

Our barbecues are popular in holiday parks, beachfront, and apartment rooftops. Regardless of the location, ICON has you covered. Buy it off-the-shelf in brushed stainless-steel, or powder-coated in Weathered steel or Monument. You can also choose from an extensive range of standard colours.

EASY TO CLEAN

The ICON's all-stainless construction makes it durable, corrosion-resistant, and easy to clean. The split doors allow you to handle the waste tray at knee-height, rather than lift it off the floor. A grease trap overflow system exits the cabinet to avoid waste build-up.

SIMPLE TO MAINTAIN

You can replace any part of the ICON on site. Quick-release doors are easily removed for service, cleaning, or changing the opening swing direction. All panels and even the doors are interchangeable and available as spare parts.

INDIVIDUAL FOOD PREPARATION AREAS

The benchtop offers individual food preparation spaces. Our barbecue cooktops have no buttons in the door or benchtop. You can orientate them in opposing directions, allowing users to maintain an appropriate distance while sharing the facility.

Design without compromise

The ICON cabinet is designed specifically for our high performance, energy-efficient Christie CC2 Cooktops. Together they are the ultimate commercial barbecue for shared use.

KEY FEATURES:

- Disability Discrimination Act (DDA) compliant, enabling seated and standing users of all abilities to cook
- Sleek low-profile benchtop with large, individual food preparation spaces
- Split doors with a raised waste container for ease of removal and cleaning
- Quick-release doors for service, cleaning or changing the swing direction
- All components and panels can be replaced on site
- Explicitly designed for use with our celebrated high-efficiency CC2 cooktops
- Corrosion resistant, low maintenance 304-grade stainless steel construction
- Flat-packed for easy site access and reduced freight costs
- Fast, simple assembly by any competent person
