Cleaning Kit

- Robust, ergonomic cleaning handle
- Quick-grip Velcro pad design
- Heavy-duty, long-lasting scouring pads
- Fast, safe, and effective solution
- Replacement scourer pads available in bulk
- Non-scratch, stainless friendly materials

Barbecue Cleaner and Degreaser

HOW IT WORKS:

Cleaner

The pH-neutral cleaner breaks down grease and cooking residue quickly and effectively. The enzyme action works efficiently in cold water. Apply the solution to the cooking surface, let it soak for 3-5 minutes, then scrub with the Cleaning Kit, Scotch Brite® or stainless steel scourer.

Cleaning Kit

The industrial scouring pads and handle specifically suit the cleaning application for the cooktop surface. Quickly and easily remove residue from the cooking surface.

Refer to our Universal Cleaning Instructions or **scan the QR code above** for a video cleaning demonstration.
