

CHRISTIE

Waste System Options

Barbecue facilities that are clean and maintained to a high standard encourage use, improve user satisfaction, and maximise the return on asset investment. Depending on your unique circumstances and requirements, we offer various cleaning options to suit your location and budget.

Why introduce different waste system options?

Communal barbecues are placed in environments ranging from arid to marine locations, from high-use holiday destinations to remote and lower-use pocket parks.

Asset owners who clean their barbecues are generally highly engaged. However, we appreciate that some contract cleaners, especially those with high staff turnover, may be unable to maintain complex cleaning regimes. For these reasons, we offer different solutions to meet our client's unique needs.

CHOOSE YOUR OPTION

ESSENTIAL Waste System

Offers the minimum level of cleaning and engagement necessary to maintain low-use barbecues to a satisfactory level for shared use.

Includes:

- Christie Barbecue Cleaner and Degreaser
- Christie Cleaning Kit
- Christie Bagged Waste Container or Easy Drain Grease Trap

Environment and placement:

Barbecues that have hoods or are located underneath shelters. Best for areas with low use and limited environmental risk.

Compatible organisations:

Government organisations with numerous barbecues and time-poor contract cleaners with high staff turnover, limited opportunities for training, and low engagement.

ENHANCED Waste System

Our enhanced waste system offers the level of cleaning and engagement necessary to maintain barbecues in exposed conditions that are subject to more frequent use.

Includes:

- Christie Barbecue Cleaner and Degreaser
- Christie Cleaning Kit
- Christie Easy Drain Grease Trap

Environment and placement:

Barbecues that are placed in the open and subject to excess water entry from rain. They are best for medium-use areas with well-maintained facilities and

Compatible organisations:

Organisations with several barbecues and cleaners who are time-poor, with limited opportunities for training and medium levels of engagement and training.

ULTIMATE Waste System

Suitable for those seeking advanced benefits, including less handling, more environmentally friendly waste, and higher levels of hygiene and cleanliness.

Includes:

- Christie Barbecue Cleaner and Degreaser
- Christie Cleaning Kit
- Christie Easy Drain Grease Trap
- Christie Filter Kit

Environment and placement:

Barbecues that are placed in the open and subject to excess water entry from rain. Best for barbecues in high and medium use areas, with highly maintained facilities and park infrastructure.

Compatible organisations:

Organisations with frequent maintenance, and highly engaged in-house cleaners who are trained, monitored, accountable, and tasked with producing quality outcomes.
